■ Application of halogen-free SABIX® BlueLine data, control and power cables for shipbuilding

The development of the new BlueLine cable series has been advanced in co-operation with customers coming from the shipbuilding field. The new cables are available as halogen-free SABIX® BlueLine cables. All SABIX® BlueLine types are constructed with tinned copper strands in class 5 in order to offer advantages in corrosion resistance and flexibility. The halogen-free SABIX® BlueLine cables have been approved by GL, LR as well as ABS. Their SABIX® characteristics fulfill the highest safety-related aspects in shipbuilding with regards to both fire performance as well as being halogen-free. Data cables, type SABIX® BlueLine Data, are available with small cross sections beginning with AWG 26. This results in a small outer diameter which offers an outstanding advantage particularly where there is only little space. The types SABIX® BlueLine Control as well as SABIX® BlueLine Power complement the new product series with control and power supply cables for electrical components.

62341215 12 x 1,5 mm² SABIX® CC 625 S FRNC M 16 AWG/12c 62341612 AWM Style 21089 75°C 600V CSA AWM I/II A/B 80°C 600V FT1 CE

SABIX® CC 625 S FRNC M is multi-conductor, shielded, flexible control cable with a smaller OD for tighter installations. It is designed for use in all electrical equipment in dry, damp, and wet conditions. An overall tinned copper braid is recommended whenever electrical interference distorts signal transmission, or when EMI emissions need to be suppressed. Recommended applications include machine tools, assembly lines, control systems, data processing equipment, connections between control panels and machines, CNC machining centers, grinding machines and bottling equipment. In case of fire no corrosive gases are produced. This cable is particularly suitable for use where human life and valuable property are exposed to an extremely high risk of fire.

Construction:

Conductor:	bare copper strands acc. to IEC 60228, EN 60228, VDE 0295, class 5
Insulation:	FRNC
Color code:	black conductors with consecutive numbers acc. to EN 50334; green-yellow earth wire from 3 conductors
Stranding:	in layers
Wrapping:	PETP foil
Screen:	tinned copper braiding

HALOGEN-FREE CABLES

Classification of smoke density acc. to NF F 16-101

SABIX® A 876 C TW TP Paired "Thin-wall" connection and data cable with overall copper screen

Marking for SABIX® A 876 C TW TP 68760307:
SAB BRÖCKSKES · D-VIERSEN · SABIX® A 876 C TWÖ TP 3 x 2 x 0,75 mm² CE

SABIX® A 876 C TW TP is a very flexible UL recognized halogen free tinned copper shielded data cable, consisting of twisted pairs. The cable is designed for use in transportation vehicles and locomotives. The "thin-wall" outer jacket guarantees a high installation standard. An overall tinned copper braid is recommended whenever electrical interference distorts signal transmission, or when EMI emissions need to be suppressed. In case of fire no corrosive gases are produced. This cable is particularly suitable for use where human life and valuable property are exposed to a extremely high risk of fire.

Construction:

Conductor:	tinned copper strands fine wires acc. to. EN 50306-2
Insulation :	SABIX® 960
Color code:	white conductors with black numbers acc. to. EN 50334
Stranding:	pairwise, pairs in layers
Wrapping:	PETP foil
Screen:	tinned copper braiding
Jacket material:	SABIX® 280
Jacket color:	black

Outstanding features:

- very flexible
- good EMC characteristics*
- halogen-free
- oil resistant
- flame retardant and self-extinguishing
- classification of smoke density acc. to NF F 16-101
- thin-walled
- high installation comfort

* Copper braiding should be connected circularly to optimize the EMC characteristics
